

ADDITIONAL COMMENTS:

Practice test is a terrific teaching device! Placing student in simulated situation, such as, surveillance, casing, & personal meeting is of a great deal of value (methods that work on paper may not work in practice). I only wish it had been possible to learn so much so easily in my college courses!

O  
ADDITIONAL COMMENTS: I love the film-testing method! Somebody  
should have thought of that idea years ago. I  
can almost look forward to tests at this rate.  
Also, in a course such as this where time is  
short, it is difficult to find time to study.  
This method eases the problem beautifully.

ADDITIONAL COMMENTS: O

**CONFIDENTIAL**

Thought the course did a lot for me in the understanding of certain terms & situations, Tradecraft techniques that before were just words that I heard or had a little contact but being in Finance I did not have the occasion to follow through. This course did some of the following through for me -
